

System Engineer

Function type: Freelance - Vast **Location:** Brussels
Duration: Long Term **Reference:** 202008388

Description:

We are looking for a System engineer with a good understanding of Azure and Cloud solutions.

Your tasks can include, but are not limited to :

- Implementation and debugging of Azure environments (IAAS, PAAS, SAAS ...)
- Analysis of network, storage products and solutions to decide which choice is optimal depending on the practical requirements of our customers
- Development of scripts using languages such as PowerShell, Python or .NET
- You will participate in a guard duty (24x7) and flexible for work outside business hours.

Requirements:

- A bachelor's degree in IT or equivalent by experience
- Experience and general knowledge about public cloud integration: aws, azure, ... (Microsoft Azure is a plus)
- Ability to design, implement and troubleshoot a technical cloud solution on various infrastructures
- Hands-on experience with troubleshooting, tracing and fixing (network, platform, deploying)
- You have experience with Windows Server, Linux, Active Directory, MS Azure and DevOps (pipelines, CI/CD)
- Knowledge of PowerShell, Python or .NET is a plus

Language Requirements:

For this opportunity you need to be trilingual (NL/FR/ENG)

Start: 2020-11-29 23:00:00
