

Integration Engineer/Infra architect

Function type: Freelance - Vast **Location:** Brussel
Duration: Longterm **Reference:** 201907747

Description:

We are urgently looking for an Integration Engineer/Infrastructure Architect.

Our client is a Belgian company that specializes in the development, implementation en maintenance of multi-technical installations and services. Over the years, the company has build up an extensive knowledge of infrastructure, buildings, industrial, distribution networks, and energy production markets. This allows the company to offer tailor-made solutions and supports to companies and local governments, which allows them to optimize their energy consumption, their impact on environment and operational performance. The IT team aims to develop an IT roadmap and to become the preferred partner for all IT related matters for the different divisions and supporting teams.

Description

- You will be part of the IT Architecture team where you will assist the enterprise architect with the development of the IT roadmap and the implementation of new projects
- You continuously exchange with the experts of the IT infrastructure teams (networks, systems, applications, integration, ...)
- You ensure a third line support for the IT environment and you support the team delivery coordinators within their daily operations
- You are able to develop and present a new IT architecture based on existing business requirements or issues
- You actively promote the cloudfirst strategy and integration within the company
- You are able to train your peers on technical topics
- You ensure communication and documentation within the team

Requirements:

Required Profile:

- Broad knowledge of all-round IT infrastructure and applications
- Knowledge of networking, systems and application designs and experience collaborating with network and system engineers
- You focus on end-to-end applications rather than infrastructure foundations
- You have experience with cloud technologies and deployments
- You have experience working in a large, professional environment and the related enterprise applications
- You have experience with ITILv3
- You have experience with integration platforms and enterprise service bus solutions
- You are at ease managing and using an API
- You have excellent communicative and presentation skills

- You have a problem-solving and a client/result oriented mindset
- You are a hands on IT professional, able to communicate with a business team
- You are able to communicate in Dutch/French/English
- You are at ease working from remote offices in Belgium

Required Skills:

- Languages: Dutch/French/English
- +3y experience within a large IT environment
- +3y experience as application owner or manager
- First experience with:
 - o Server OS: Windows server, Linux server
 - o Networking: routing, switching, vlans, firewalls, proxy servers
 - o Database: SQL server, MariaDB or Postgresql, datalakes, datawarehouses
 - o Cloud technologies like AWS, Azure, CI/CD and devops integrations
 - o Integration platforms like Biztalk, Azure logic apps, Axway, Mulesoft, ...
 - o Enterprise applications like SAP, Salesforce, ...
 - o Microsoft technologies: Sharepoint, MS flow, MS Powerapps, MS Access
 - o Nice to have: development experience (Angular, .Net)
