

Network engineer

Function type: Vast **Location:** Mechelen
Duration: long term **Reference:** 202007957

Description:

For a customer in the telecom sector, we are looking for an experienced network engineer.

Your responsibilities include:

- Installing, integrating and documenting our LAN, centralized network management tooling, NAC, Wi-Fi, and security products and services in a qualitative manner, within the agreements made with the customer.
- The remote or on-site resolution of incidents that cannot be resolved remotely by the service desk, including opening the tickets to our suppliers where necessary. Where necessary, you will simulate the incident in a laboratory environment in order to arrive at a definitive solution.
- Keeping up-to-date with the most important products assigned to you, including obtaining the necessary certificates.
- As a representative you will advise the customer and provide any additional opportunities or comments to the appropriate services.

Additional responsibilities for the senior profile:

In your technical expert role, you will take care of:

- The monitoring, testing and approval of new releases of the main product
- The validation of new products, technologies and services
- The improvement of existing products and services
- The organization of technical training for engineers

Together with the solution architect, you will deal with the technical aspects of quotations and specifications for non-standard or complex customer queries.

Required technical knowledge - MUST HAVES:

- You have a wide experience in the world of LAN and multilayer switching, Wi-Fi and network security.
- Practical experience with LAN switching, NAC and Wi-Fi for Cisco (IOS, ACI, DNA, ISE), Extreme, Aruba and/or Alcatel is a plus with a preference for Cisco.
- Affinity with NICE TO HAVE one or more additional technologies such as fabric switching, firewalls, NAC solutions, dynamic routing or rest API development will further complement your skills.

Requirements:

Profile:

- You think "out of the box", and are highly analytical and solution-oriented.
- You are "service-minded" and think along with the needs of the customer;

- You have good communication skills and can easily present a complex technology.
 - You speak fluent Dutch and English. Knowledge of French is a plus.
 - You're willing to take on stand-by duty.
-
- You have a master or professional bachelor in Computer Science or Electronics, or have equivalent experience
 - You have at least 5-8 years of experience as a network engineer
